

Overview:

The safety signs and fire action notices will be in accordance with BS 5393 and the 'Mandatory Sign' set will include the 'Signs for Escape Routes' and 'Signs for Fire Exits' indicating escape routes and exits.

All fire exits in an escape route shall be provided with a fire door or fire door assembly with the working man's view marked with the directional arrow and supplementary fire door assembly sign.

All the safety signs and notices shall be made from hard PVC and shall be measured from the highest point of the sign to the bottom edge of the sign to ensure that the sign can be clearly seen and read from all directions to the sign.

The notices and fire signs should be securely fixed to prevent removal by unauthorized persons.

All fire doors shall be marked 'Fire Door Keep Shut' where the sign will be clearly visible to the person using the door from both sides of the door.

All fire doors leading to open air shall be marked 'Fire Door Keep Open in a Position Where the Sign Will be Clearly Visible'.

Signs and Ratings Legend:
